Peter Mac

We are delighted to announce that Peter Mac Box Hill has recently completed a major redevelopment, which over the last two years has resulted in a superb new facility offering:

Now located within the Epworth Eastern Medical Centre, Peter Mac Box Hill has served the local community and the Eastern suburbs of Melbourne for over 20 years, providing:

- **Spacious new areas for patients and staff.**
- **A modern, comfortable and friendly environment.**
- **All-new, state-of-the-art radiotherapy planning and treatment equipment.**
- **Specialist radiation oncology services.**
- **Close collaboration with local oncologists, surgeons, physicians and general practitioners.**
- **Emphasis on patient centred service.**

Peter Mac Box Hill in the Epworth Eastern Medical Centre.

Our high standard of patient care reflects:

- **The expertise of our radiation oncologists all of whom also work in sub-specialty units within Peter Mac's main campus.**
- **Dedicated and highly skilled radiation therapists.**
- **Caring and experienced oncology nursing staff.**
- **On site availability of allied health services, including social work and occupational therapy.**
- **Prompt access to outpatient consultations and radiotherapy treatment.**
- **A culture of research, education and evidence-based best practice.**
- **Rigorous quality processes.**

A culture of research, education and evidence-based best-practice.

Equipment at Peter Mac Box Hill allows the most modern techniques including:

- **Intensity Modulated Radiation Therapy (IMRT) providing the ability to deliver curative radiation with greater precision (for example, for prostate cancer).**
- **Electronic portal imaging and on board imaging/image guided radiotherapy to improve the efficiency and accuracy of treatment.**
- **Modern planning equipment and a multi-slice dedicated planning CT scanner.**

Peter Mac Box Hill works closely with clinicians at Box Hill Public and Epworth Eastern Private Hospitals, and we are able to provide convenient access to radiotherapy treatment for in-patients at these hospitals. Our medical staff collaborate in a number of multidisciplinary groups with local specialists.

Our patients have the convenience of easy access to diagnostic imaging, pathology and pharmacy services on site.

Diagnostic imaging, pathology and pharmacy on site.
